Honorable Board of Commissioners
Housing Authority of the
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Commissioners:

**APPROVAL OF ALLOCATION OF CITY OF INDUSTRY REDEVELOPMENT
HOUSING SET-ASIDE FUNDS AND APPROVAL OF ENVIRONMENTAL
DOCUMENTATION
(District 1, 2) (3 Vote)**

SUBJECT:

This letter requests that your Board approve the allocation of City of Industry Redevelopment Housing Set-Aside Funds for two affordable rental housing developments located within a 15-mile radius of the City of Industry.

IT IS RECOMMENDED THAT YOUR BOARD :

1. Acting as a Responsible Agency for the 105th Street & Normandie Senior Housing Project, certify that the Housing Authority has independently considered the attached Environmental Assessment/Mitigated Negative Declaration (EA/MND) prepared by the Community Development Commission, as Lead Agency, and reached its own conclusions regarding the environmental effects of the project; and find that the mitigation measures identified in the EA/MND are adequate to avoid or reduce potential environmental impacts to below significant levels.
2. Find that the Downtown Women's Center Project is exempt from the provisions of the California Environmental Quality Act (CEQA), as described herein, because the project does not have the potential for causing a significant effect on the environment.

3. Approve loans to developers using City of Industry Redevelopment Housing Set-Aside Funds (Industry Funds) in a total amount of up to \$1,989,155 for the development of the 105th and Normandie Senior Housing Project and up to \$2,000,000 for the Downtown Women's Center Project, which have been selected through a Notice Of Funding Availability (NOFA) jointly issued by the Housing Authority and the Community Development Commission on January 22, 2008.
4. Authorize the Executive Director to negotiate loan agreements with the recommended developers, for the purposes described above, to execute the loan agreements and all related documents, including documents to subordinate the loans to permitted construction and permanent financing and any intergovernmental, interagency, or inter-creditor agreements necessary for the implementation of each development, following approval as to form by County Counsel.
5. Authorize the Executive Director to execute amendments to the loan agreements and any related document, as may be necessary for the implementation of each development, following approval as to form by County Counsel.
6. Authorize the Executive Director to incorporate, as needed, a total of \$3,989,155 in Industry funds into the Housing Authority's approved Fiscal Year 2008-2009 budget, for the purposes described above.

PURPOSE /JUSTIFICATION OF RECOMMENDED ACTION:

The purpose of the recommended actions is to approve the allocation of Industry Funds and required environmental documentation for the 105th and Normandie Senior Housing Project and the Downtown Women's Center Project.

FISCAL IMPACT/FINANCING:

There is no impact on the County general fund.

The Housing Authority is recommending loans to Southern California Housing Development Corporation of Los Angeles and Downtown Women's Center in a total amount up to \$3,989,155 in Industry Funds to construct the 105th and Normandie Senior Housing Project and the Downtown Women's Center Project, respectively. Funds for these loans will be incorporated into the Housing Authority's approved Fiscal Year 2008-2009 budget on an as-needed basis.

Final loan amounts will be determined following completion of negotiations with the developers and arrangements with other involved lenders. Each loan will be evidenced by a promissory note and secured by a deed of trust, with the term of affordability enforced by a recorded Covenants, Conditions and Restrictions document.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS:

Industry Funds consist of tax increment funds collected by the City of Industry's Redevelopment Agency, which have been transferred to the Housing Authority to administer for the development of low- and moderate-income housing. On June 2, 1998, your Board adopted an Allocation and Distribution Plan for the disbursement of Industry Funds in incorporated and unincorporated areas within a 15-mile radius of the City of Industry. Ten previous solicitations for proposals processes have awarded a total of an estimated \$166,237,180 in Industry Funds to 173 developments, created 5,962 units of affordable and special needs housing, and leveraged over \$1,220,507,109 in external funds.

On January 22, 2008, a Notice Of Funding Availability (NOFA) was jointly issued by the Housing Authority and the Community Development Commission, making available approximately \$15,000,000 in Industry Funds and \$5,000,000 in County HOME Investment Partnerships (HOME) funds for the development of affordable rental housing. Eighteen requests for Industry funds and six requests for HOME funds were received by the February 26, 2008 deadline. Review and evaluation has been completed for all of the initial applications under the NOFA process. Of the 22 projects, four met threshold criteria. Of the four projects, three met technical scoring criteria. The Housing Authority recommends awarding Industry Funds to two of the projects: the 105th and Normandie Senior Housing Project and the Downtown Women's Center Project. HOME funds will be recommended for the third qualified project in a future Board letter. Environmental clearances and funding recommendations for the two projects receiving Industry funds are being presented to your Board at this time. A detailed description of the NOFA and selection process is provided as Attachment A.

The total demand exceeded the amount of available funding. Funds that were not allocated in the 11th round of the NOFA were made available to developers through reissuance of the NOFA, resulting in a 12th round. Projects selected through the 12th round reissuance will be presented to the Board of Commissioners of the Community Development Commission and the Housing Authority at a later date.

The current funding recommendations will provide Industry Funds to the developers through Loan agreements with the Housing Authority or Commission, to be executed by the Executive Director, following completion of negotiations and approval as to form by

County Counsel. All loan agreements will incorporate affordability restrictions and provisions requiring developers to comply with all applicable federal, state, and local laws.

The loan agreements will set aside a minimum of 20% of each development's rental units at rates affordable to low-income households earning less than 50% of the area median income (AMI) for the Los Angeles-Long Beach Metropolitan Statistical Area (MSA), adjusted for family size, as established by the U.S. Department of Housing and Urban Development (HUD). For special needs housing, a minimum of 35% of the units will be reserved for households with incomes below 50% of AMI. The loan agreements will require that the affordable units be set aside for a period of 55 years.

ENVIRONMENTAL DOCUMENTATION:

105th Street & Normandie Senior Housing Project:

An Environmental Assessment was prepared for the project pursuant to the requirements of the National Environmental Policy Act. Based on the conclusions and findings of the Environmental Assessment, a Finding of No Significant Impact was approved by the Certifying Official of the Community Development Commission on February 7, 2007. Following the required public and agency comment period, HUD issued a Release of Funds for the project on February 21, 2007.

The Board of Commissioners of the Community Development Commission approved the EA/MND for this project on November 6, 2007.

As a Responsible Agency, and in accordance with the requirements of CEQA, the Housing Authority reviewed the EA/MND prepared by the Community Development Commission and determined that the project will not have significant adverse impact on the environment. The Housing Authority's consideration of the EA/MND and filing of the Notice of Determination satisfy CEQA Guidelines as stated in Article 7, Section 15096.

The environmental review record for this project is available for public viewing during regular business hours at the Commission's main office, located at 2 Coral Circle in Monterey Park.

Downtown Women's Center Project:

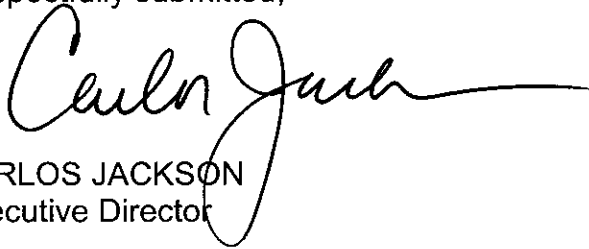

This action is exempt from the provisions of CEQA pursuant to State CEQA Guidelines Section 15301, because it does not have the potential for causing a significant effect on the environment.

Honorable Board of Commissioners
July 1, 2008
Page 5

IMPACT ON CURRENT PROGRAM:

The recommended allocation of Industry Funds, totaling up to \$3,989,155 for the two recommended projects, will leverage more than \$34,929,888 in additional external resources, approximately 9.76 times the amount of Industry Funds being recommended for allocation at this time. The requested actions will increase the supply of affordable special needs and non-special needs housing in the County.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Carlos Jackson', with a long horizontal flourish extending to the right.

CARLOS JACKSON
Executive Director

Attachments: 3

ATTACHMENT A

NOTICE OF FUNDING AVAILABILITY AND SELECTION PROCESS

On December 22, 2007, advertising for the NOFA began in local newspapers. The NOFA was released on January 22, 2008, and subsequent informational workshops were held to provide prospective applicants with technical assistance.

Applications were accepted between February 12 and February 26, 2008. The total demand exceeded available funding. Developers applied for funds according to target population.

Non-Special Needs Housing Developments

TYPE	CITY OF INDUSTRY DEMAND	HOME DEMAND	ALLOCATION
Seniors	\$3,685,155 2 Applications	\$5,240,000 2 Applications	\$1,989,155 1 Development: <i>105th & Normandie Senior Housing Project</i>
Family	\$10,235,400 7 Applications		
Single Family	\$500,000 1 Application	\$500,000 1 Application	
TOTAL	\$14,420,555 10 Applications	\$5,740,000 3 Applications	\$1,989,155 1 Development

Special Needs Housing

TYPE	CITY OF INDUSTRY DEMAND	HOME DEMAND	ALLOCATION
Mental Illness	\$4,000,000 2 Applications		\$2,000,000 1 Development: <i>Downtown Women's Center Project</i>
Developmentally Disabled	\$1,800,000 1 Application		
Domestic Violence	\$232,177 1 Application		
Transitional Age Youth	\$4,092,172 3 Applications		
Homeless	\$895,388 1 Application	\$11,600,000 3 Applications	
TOTAL	\$11,019,737 8 Applications	\$11,600,000 3 Applications	\$2,000,000 1 Development

Each recommended proposal has undergone a review by technical consultants. In addition, in order to verify expertise and service linkages submitted by applicants, proposals for special needs housing were reviewed by a Task Force established by the Executive Director. The Task Force was comprised of persons with experience in serving the targeted special needs populations. Following this process, the proposals were forwarded to the Housing Authority/Commission's Independent Review Panel which provided independent review of the Task Force's scoring and also heard the appeals.

The NOFA included a process for applicants to appeal individual scores for procedural or technical errors. Applicants were notified of the scoring results and given seven days to appeal. Two appeals were filed. The appeals were presented to the Independent Review Panel, and have been heard and administratively adjudicated. One of the two appeals in the non-special needs housing category received had enough points to receive a funding recommendation.

The recommended funding awards are based on threshold criteria and only proposals scoring a minimum of 70% of the total points for the Development Feasibility and Supportive Services and Operation Plan and a minimum of 70% of the total overall points were considered for an award. The recommended awards are being made in accordance with the County's current Housing and Community Development Plan (HCDP) and the planning documents of other affected jurisdictions. The Executive Director may enter into memoranda of understanding and other agreements with other jurisdictions, if necessary for development of the proposed projects.

**County of Los Angeles
Community Development Commission**

**CALIFORNIA ENVIRONMENTAL QUALITY ACT
DRAFT MITIGATED NEGATIVE DECLARATION**

PROJECT TITLE: 105th Street Senior Housing Project

PROJECT DESCRIPTION: The proposed project involves the development of 70 units of affordable rental housing (in one building) on six parcels. Each rental unit would be approximately 600 square feet. The project will also include development of a community center of up to 5,000 square feet and CDC office space of up to 4,000 square feet (together in one building). One vacant single family home and two vacant government office buildings would be demolished. Offsite improvements may include pavement repair, curbs, gutters, sidewalks, and utility installation.

The site is currently zoned Two Family Residential (R-2/RD 3.1) and Community Commercial (C2). A zone change will not be necessary. A CUP plus a density bonus will accommodate the proposed development.

PROJECT LOCATION: The project site is located within the unincorporated community of Athens in Los Angeles County, California. The approximately 1.4 acre site is located at 10402, 10408, 10410 and 10426 South Normandie Avenue and 1344 West 104th Street and 1335 West 105th Street.

MITIGATION MEASURES INCLUDED IN THE PROJECT TO AVOID POTENTIALLY SIGNIFICANT IMPACTS:

The following mitigation measures are required:

1. **Historic, Cultural, and Archaeological Resources.** No archaeological resources are known to be on the project site. However, in the event that archaeological resources are unearthed during project construction, all earth disturbing work within the project's archaeological area of potential effect (APE) must be temporarily suspended until a qualified archaeologist has evaluated the nature and significance of the find. A Gabrielino representative should monitor any excavation associated with Native American materials. After the find has been appropriately mitigated, work in the area may resume. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.
2. **Solid Waste Recycling.** Because of ongoing concerns about available landfill capacity, project design shall incorporate space for separate bins for waste and recyclable materials.

3. **Water Supply.** Because of ongoing concerns about regional water supplies, the following shall be incorporated into project design:
- To the degree feasible, landscaped areas shall be designed with drought-tolerant species. Irrigation shall be accomplished with drip systems. Planting beds shall be heavily mulched in accordance with water-conserving landscape design practice.
 - All new structures shall be fitted with water conserving fixtures, including, but not limited to, low flow faucets and toilets.
4. **Additional Modifications.** Minor changes to the mitigation measures required as a condition of funding approval are permitted, but can only be made with the approval of the Executive Director of the Community Development Commission (CDC) of Los Angeles County.

FINDING OF NO SIGNIFICANT EFFECT. Based on the attached NEPA Environmental Assessment, it has been determined that the project will not have a significant effect on the environment, provided that all suggested mitigation measures are incorporated.

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

HUD - NEPA- ENVIRONMENTAL ASSESSMENT

Project Name: 105th Street Senior Housing Project

Project Location: The project site is located within the unincorporated community of Athens in Los Angeles County, California. The approximately 1.4 acre site is located at 10402, 10408, 10410 and 10426 South Normandie Avenue and 1344 West 104th Street and 1335 West 105th Street. Figure 1 shows the regional location of the project, and Figure 2 shows the location of the project within the community of Athens.

Assessor's Parcel Number(s): 6060-009-900, 902, 903, 904, 905, 906

Statement of Need: The project is consistent with the guidelines of the CDBG program. The proposed project provides for the development of affordable senior housing and a community center.

Project Description: The proposed project involves the development of 70 units of affordable rental housing (in one building) on six parcels. Each rental unit would be approximately 600 square feet. The project will also include development of a community center of up to 5,000 square feet and CDC office space of up to 4,000 square feet (together in one building). One vacant single family home and two vacant government office buildings would be demolished. A portion of the alley between 104th and 105th Streets may be vacated and or redirected to accomodate project. Offsite improvements may include pavement repair, curbs, gutters, sidewalks, and utilities.

The site is currently zoned Two Family Residential (R-2/RD 3.1) and Community Commercial (C2). A zone change will not be necessary. A CUP plus a density bonus will accommodate the proposed development.

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
Land Development							
Conformance With Comprehensive Plans and Zoning	X						The site is currently zoned R-2/RD 3.1 and C2 in the West Athens Community Plan. A CUP plus a density bonus will accommodate the proposed project. (a)
Compatibility and Urban Impact	X						The project site is bounded by residential and government uses to the east, residential uses to the north, residential and commercial uses to the west, and residential uses to the south (b). The proposed project would be compatible with the scale and type of surrounding development.
Slope	X						The site is generally flat (b). The proposed development would not involve major topographic modifications or create any significant erosion or sedimentation problems.
Erosion	X						There is no evidence of any substantial erosion problems onsite (b).
Soil Suitability	X						There is no evidence of soil suitability problems on the project site (b). Routine soil tests would need to be conducted to determine foundation design parameters for new structures.
Hazards and Nuisances, Including Site Safety	X						Former underground storage tanks on the site resulted in contamination of site soils. However, the former contamination has been remediated and no soils with contaminants exceeding regulatory action levels remain. On October 28, 2004, the California Regional Water Quality Control Board (RWQCB) determined that no further action related to the petroleum releases at the site is required.
Energy Consumption	X						Project operation would incrementally increase the consumption of electricity and natural gas. However, because these resources are available both locally and regionally, no significant impact to the availability of energy resources is expected over the long-term. The project would comply with state energy conservation requirements.
Noise							
Effects of Ambient Noise on Project and Contribution to Community Noise Levels	X						Project construction would generate short-term noise level increases. Local noise ordinances would apply. The proposed project is affordable senior housing and is not expected to generate substantial noise. The project is itself a noise sensitive use, but ambient noise levels do not exceed HUD's 65 decibel Ldn exterior standard for residences as the site is not adjacent to any major noise sources. Use of standard building techniques would be expected to achieve an acceptable interior noise level of 45 dBA Ldn or less.

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
Air Quality							
Effects of Ambient Air Quality on Project and Contribution to Community Air Pollutant Levels	X						<p>The project site is located in the South Coast Air Basin, which is a nonattainment area for ozone, carbon monoxide, and fine particulate matter (PM₁₀). Project residents and employees of the community center and CDC office would be exposed to potentially unhealthy ambient air because this regional condition cannot be feasibly mitigated. Traffic associated with the project would incrementally increase air pollutant emissions, but such emissions would not exceed locally adopted significance thresholds or hinder attainment of federal air quality standards (d).</p> <p>Existing South Coast Air Quality Management District (SCAQMD) regulations restrict the emissions of dust and fumes during construction and the project would be required to conform to these requirements.</p>
Environmental Design and Historic Values							
Visual Quality - Coherence, Diversity, Compatible Use, and Scale	X						<p>The project would involve the development of 70 units of affordable housing for seniors, a community center and CDC office space. The surrounding neighborhood consists of single-family residential development and neighborhood-serving commercial uses along Normandie Avenue (b). The project would be compatible with the visual context of the existing neighborhood.</p>
Historic, Cultural, and Archaeological Resources					X		<p>Historic and archaeological evaluations were conducted for the project site (h, i). The project is not expected to disturb either historic or archaeological resources; nevertheless, if previously unidentified archaeological resources are identified during grading or construction, work will need to be temporarily suspended while the find is evaluated by a qualified archaeologist.</p>
Socioeconomic Conditions							
Demographic/Character Changes	X						<p>The proposed project includes 70 units of affordable housing intended to serve the housing needs of current area. Assuming one to two persons per household, this would generate a population of about 70 to 140. Such a population increase would not substantially change the demographic character of the area.</p>
Displacement	X						<p>Development of the project would require the demolition of one vacant, single-family house and two vacant government buildings. No displacement would occur.</p>
Employment and Income Patterns	X						<p>The project would generate temporary employment opportunities during construction. Long-term employment opportunities would be created in the community center</p>

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
							and CDC office. No adverse impacts to employment or income patterns are expected.
Community Facilities and Services							
Educational Facilities		X					The proposed project is a senior housing complex and therefore would not adversely affect educational facilities.
Commercial Facilities	X						The proposed project would not adversely affect commercial facilities and may incrementally increase the customer base for existing commercial businesses.
Health Care	X						The proposed project may incrementally increase demand for health care services in the area; however, because it is intended to serve the housing needs of current area residents, it would not affect health care facilities or services.
Social Services		X					The proposed project would provide affordable housing for seniors, a community center and CDC office space. It would not require any new social services.
Solid Waste					X		The proposed project would incrementally increase the generation of solid waste over existing conditions. This increase is not expected to significantly affect area landfills. Nevertheless, because of ongoing concerns about regional landfill capacity, project design should accommodate solid waste recycling.
Waste Water	X						The proposed project would increase wastewater generation as compared to the currently vacant site. However, wastewater infrastructure is in place. Since the project would be consistent with the land use designations for the site in the General Plan, it is anticipated that wastewater infrastructure has been sized to accommodate urban development similar to that proposed.
Storm Water	X						The project site is partially developed with impervious surfaces, while other portions are undeveloped with exposed ground surface (b). Project development would increase the amount of impervious surfaces onsite, which could contribute to an incremental increase in runoff and a decrease in water quality. However, storm drains would be installed on the site as part of project development and would be sized adequately to accommodate runoff from the site. The project would comply with local, state, and federal requirements pertaining to control of stormwater runoff. Therefore, significant impacts are not anticipated.
Water Supply					X		Water service would be provided by the Los Angeles County Waterworks, District 1 (e). The project would incrementally increase water consumption as compared to the current use but is not expected to significantly affect water supply. Nevertheless, because of ongoing concerns

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
							about water supply in the Southern California region, water conservation measures shall be incorporated into the design of the project.
Public Safety Police	X						The Los Angeles County Sheriff's Department's Lennox Station, located approximately 3.5 miles from the project site at 4331 Lennox Blvd. in Inglewood, provides police protection services in the project vicinity (e, f). The proposed project would incrementally increase demand for police protection services. However, this increase would be nominal and no adverse impacts to police services are expected.
Fire	X						The Los Angeles County Fire Department Station 14 would provide fire protection, paramedic and emergency medical technician services to the project site. The station is located at 1401 W. 108 th Street (e), approximately four blocks south of the project site (f). The proposed project would slightly increase the demand for fire protection services; however, assuming compliance with Fire Department requirements, no adverse impacts to fire protection services are anticipated from development of the project.
Emergency Medical	X						The Los Angeles County Fire Department would provide emergency medical services. Emergency victims would be taken to the Los Angeles County King-Drew Medical Center or Robert F. Kennedy Medical Center emergency rooms (e). No adverse impacts to emergency medical services are anticipated.
Open Space And Recreation Open Space	X						The project would not adversely affect any areas designated as public open space.
Recreation	X						Jesse Owens Community Park and Little Green Acres Park are located about one mile west and east of the site, respectively (e). No adverse impacts to these facilities are expected.
Cultural Facilities		X					The proposed project would not adversely affect any cultural facilities (b). The proposed community center is expected to be culturally beneficial to the community.
Transportation	X						The proposed project would generate an estimated 203 average daily vehicle trips, including 20 trips during the AM peak hour and 27 trips during the PM peak hour (g). This would incrementally increase traffic on roadways in the immediate project vicinity, but is less than the 500-trip threshold at which the County of Los Angeles normally requires a traffic study. Significant impacts to the area circulation system are not anticipated.

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Impact Categories	No Impact Anticipated	Potentially Beneficial	Potentially Adverse Requires Documentation Only	Potentially Adverse Requires More Study	Needs Mitigation	Requires Project Modification	Source or Documentation (See Attached References)
Natural Features							
Water Resources	X						The proposed project would not affect water resources (e).
Surface Water	X						No surface water is located onsite. Therefore, no impacts to surface water would occur.
Watercourses	X						There are no watercourses within the vicinity of the project area (e). No impact to watercourses is anticipated.
Unique Natural Features and Agricultural Lands	X						The proposed project would not affect any natural features. No active agricultural lands or agriculturally zoned lands are present within the project area (e).
Vegetation and Wildlife	X						The project site is in a highly urbanized area. No important biotic communities exist and no wildlife was observed onsite (b). Therefore, the project would not significantly affect vegetation or wildlife.
Long-Term Effects							
Growth-Inducing Impacts	X						The proposed project would provide affordable senior housing and could directly induce population growth by enticing people to move to the City. However, the project is intended to provide housing services for existing City residents and thus is not expected to attract a significant number of people from outside the region. The project would not require the extension of infrastructure or roadways since the sites have been developed in the past. Therefore, the project's potential to induce growth is not considered significant.
Cumulative Effects	X						The proposed project would provide infill development in an urbanized area. While it would increase the intensity of development on the project sites, it would not result in any significant impacts that would be cumulatively considerable.

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Area of Statutory/ Regulatory Compliance	Not Applicable To this Project	Consultation Required and Completed	Permits Required and Obtained	Project Consistent with Applicable Policies	Conditions and/or Mitigation Actions Required	Note Compliance Documentation
1. Historic Properties 36 CFR 800 (CDBG) 36 CFR 801 (UDAG)					X	Historic and archaeological assessments were conducted for the project site (h, i). Though archaeological resources are not known on-site, work should be halted temporarily in the event that as yet undiscovered resources are uncovered during grading.
2. Floodplain Management 42 FR 26951	X					The project site is located within flood zone C or X, FEMA panel 065043-0910B, indicating minimal flood potential and no flood insurance requirement (e).
3. Wetlands Protection 42 FR 26951	X					No wetlands are located on or near the project site (e).
4. Coastal Zone Plan 16 U.S.C. 1451	X					The project site is not located in a coastal zone (e).
5. Sole Source Aquifers 42 U.S.C. 201, 300(g) and 21 U.S.C. 349	X					No impact to primary drinking water sources is anticipated.
6. Endangered Species 16 U.S.C. 1531	X					The project site is in an urbanized area. No endangered species are located in the area.
7. Wild and Scenic Rivers 16 U.S.C. 1271	X					No wild or scenic rivers are located in the site vicinity.
8. Air Quality Protection 42 U.S.C. 7401	X					The project site is located in the South Coast Air Basin, which is a nonattainment area for ozone, carbon monoxide, and fine particulate matter (PM ₁₀). Residence and employees of the community center and CDC offices would therefore be exposed to potentially unhealthful ambient air because this regional condition cannot be feasibly mitigated. Traffic associated with the project would incrementally increase air pollutant emissions, but such emissions would not exceed locally adopted significance thresholds or hinder attainment of federal air quality standards (d). Existing SCAQMD regulations restrict the emissions of dust and fumes during construction and the project would be required to conform to these requirements.
9. Farmland Protection 7 U.S.C. 4201	X					No agricultural uses are located on-site or in the vicinity of the project.

Area of Statutory/ Regulatory Compliance	Not Applicable To this Project	Consultation Required and Completed	Permits Required and Obtained	Project Consistent with Applicable Policies	Conditions and/or Mitigation Actions Required	Note Compliance Documentation
10. Environmental Justice Executive Order 12898	X					The project would provide additional employment opportunities in the community and would provide affordable housing for area residents. The project would not expose low-income or minority populations to any environmental justice concerns.
11. HUD Environmental Standards, 24 CFR 51 as amended						
a. Noise Abatement 24 CFR 51B	X					Project construction would generate short-term noise level increases. Local noise ordinances would apply. The proposed project is affordable senior housing and is not expected to generate substantial noise. The project is itself a noise sensitive use, but ambient noise levels do not exceed HUD's 65 decibel Ldn exterior standard for residences as the site is not adjacent to any major noise sources. Use of standard building techniques would be expected to achieve an acceptable interior noise level of 45 dBA Ldn or less.
b. Landfill Hazards CPD Letter 79-33	X					The project site is not subject to any known landfill hazards (b).
c. Upset Hazards 24 CFR 51B	X					The project site is not subject to any known upset hazards, nor would the proposed use create any significant upset hazards (b).
d. Flammable Oper. 24 CFR 51C	X					The project site is not subject to any known flammable operations or explosives (b).
e. Toxic/Radioactivity HUD Notice 79-33	X					The project site is not subject to any known radioactivity (b). As discussed under "Hazards and Nuisances, Including Site Safety," soil contamination exceeding regulatory action levels is not present onsite.
f. Airport Clear Zones 24 CFR 51D	X					The project site is not in an airport clear zone (e).

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Summary of Findings and Conclusions:

The proposed project involves the development of 70 units of affordable rental housing for seniors on a vacant, 1.4 acre site. The project would also include development of a community center of up to 5,000 square feet and CDC office space of up to 5,000 square feet. The site is currently zoned RD 3.1 and C2. The proposed project would be consistent with these designations. Neighboring land uses consist of residential and commercial development. The proposed project would be compatible with the scale and visual character of the surrounding area.

The project site is generally flat. No watercourses or water resources are located in the project area. No threatened or endangered wildlife was observed on the site. Former underground storage tanks on the site resulted in contamination of site soils. However, the former contamination has been remediated and no soils with contaminants exceeding regulatory action levels remain.

The project would not significantly affect public facilities. Implementation of the project would create short-term employment opportunities during construction and long-term employment opportunities in the community center and CDC office. The proposed project is not expected to disturb either historic or archaeological resources; nevertheless, if previously unidentified archaeological resources are identified during grading or construction, work will need to be temporarily suspended while the find is evaluated by a qualified archaeologist.

The proposed project would not consume substantial quantities of water or energy or generate substantial quantities of solid waste or wastewater. Nevertheless, water conservation measures and recycling facilities should be incorporated into project design. The project is located outside the 500-year flood area, indicating minimal flood potential in the area.

The project would conform to all applicable federal, state, and regional air pollution control regulations, both short- and long-term, and would not significantly affect local or regional air quality. The project would incrementally increase daily traffic volumes in the immediate area; however, project-generated traffic would not significantly affect local roadways. The project site is not subject to noise exceeding HUD residential standards.

Summary of Environmental Conditions:

The project site is in a highly urbanized area and consists of one vacant single family house and two vacant government buildings. Vegetation mainly consists of disturbed grasses. No wildlife was observed onsite.

Project Modifications and Alternatives Considered:

No unavoidably significant impacts were identified for the proposed project. Therefore, project alternatives or modifications have not been considered.

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

Mitigation Measures Required:

The following mitigation measures are required:

1. **Historic, Cultural, and Archaeological Resources.** No archaeological resources are known to be on the project site. However, in the event that archaeological resources are unearthed during project construction, all earth disturbing work within the project's archaeological area of potential effect (APE) must be temporarily suspended until a qualified archaeologist has evaluated the nature and significance of the find. A Gabrielino representative should monitor any excavation associated with Native American materials. After the find has been appropriately mitigated, work in the area may resume. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.
2. **Solid Waste Recycling.** Because of ongoing concerns about available landfill capacity, project design shall incorporate space for separate bins for waste and recyclable materials.
3. **Water Supply.** Because of ongoing concerns about regional water supplies, the following shall be incorporated into project design:
 - To the degree feasible, landscaped areas shall be designed with drought-tolerant species. Irrigation shall be accomplished with drip systems. Planting beds shall be heavily mulched in accordance with water-conserving landscape design practice.
 - All new structures shall be fitted with water conserving fixtures, including, but not limited to, low flow faucets and toilets.
4. **Additional Modifications.** Minor changes to the mitigation measures required as a condition of funding approval are permitted, but can only be made with the approval of the Executive Director of the Community Development Commission (CDC) of Los Angeles County.

- g. Institute of Transportation Engineers, *Trip Generation*, 7th Edition, 2003.
Project-generated traffic was calculated by multiplying the project size (units, square feet) by the applicable trip generation rate. The average daily traffic (ADT) rate for attached senior housing is 1.1 trips per unit, for rate for a recreational community center is 16.4 trips per 1,000 square feet, and the rate for general office space is 11.01 trips per 1,000 square feet. For attached senior housing, the AM peak hour rate is 0.08 trips per unit and the PM peak hour rate is 0.11 trips per unit. For a recreational community center, the AM peak hour rate is 1.62 trips and the PM peak hour rate is 1.64 trips per unit. For general office space, the AM peak hour rate is 1.55 trips per unit and the PM peak hour rate is 1.49 trips per unit.

HUD – NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

1. Is the project in compliance with applicable laws and regulations? ☒ Yes ☐ No
2. Is an EIS required? ☐ Yes ☒ No
3. A Finding of No Significant Impact (FONSI) can be made. The project will not significantly affect the quality of the human environment. ☒ Yes ☐ No

Basic Reasons Supporting Decision:

The proposed project involves the development of 70 units of affordable rental housing for seniors, 5,000 square feet of office space, and a 5,000 square foot community center on a vacant, 1.4 acre site. The project involves infill development in a highly urbanized area of Los Angeles County. Based on the Environmental Assessment, it has been determined that with implementation of recommended mitigation measures, the proposed project would not generate any significant environmental impacts.

The following mitigation measures are required:

1. **Historic, Cultural, and Archaeological Resources.** No archaeological resources are known to be on the project site. However, in the event that archaeological resources are unearthed during project construction, all earth disturbing work within the project's archaeological area of potential effect (APE) must be temporarily suspended until a qualified archaeologist has evaluated the nature and significance of the find. A Gabriolino representative should monitor any excavation associated with Native American materials. After the find has been appropriately mitigated, work in the area may resume. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.
2. **Solid Waste Recycling.** Because of ongoing concerns about available landfill capacity, project design shall incorporate space for separate bins for waste and recyclable materials.
3. **Water Supply.** Because of ongoing concerns about regional water supplies, the following shall be incorporated into project design:
 - To the degree feasible, landscaped areas shall be designed with drought-tolerant species. Irrigation shall be accomplished with drip systems. Planting beds shall be heavily mulched in accordance with water-conserving landscape design practice.
 - All new structures shall be fitted with water conserving fixtures, including, but not limited to, low flow faucets and toilets.

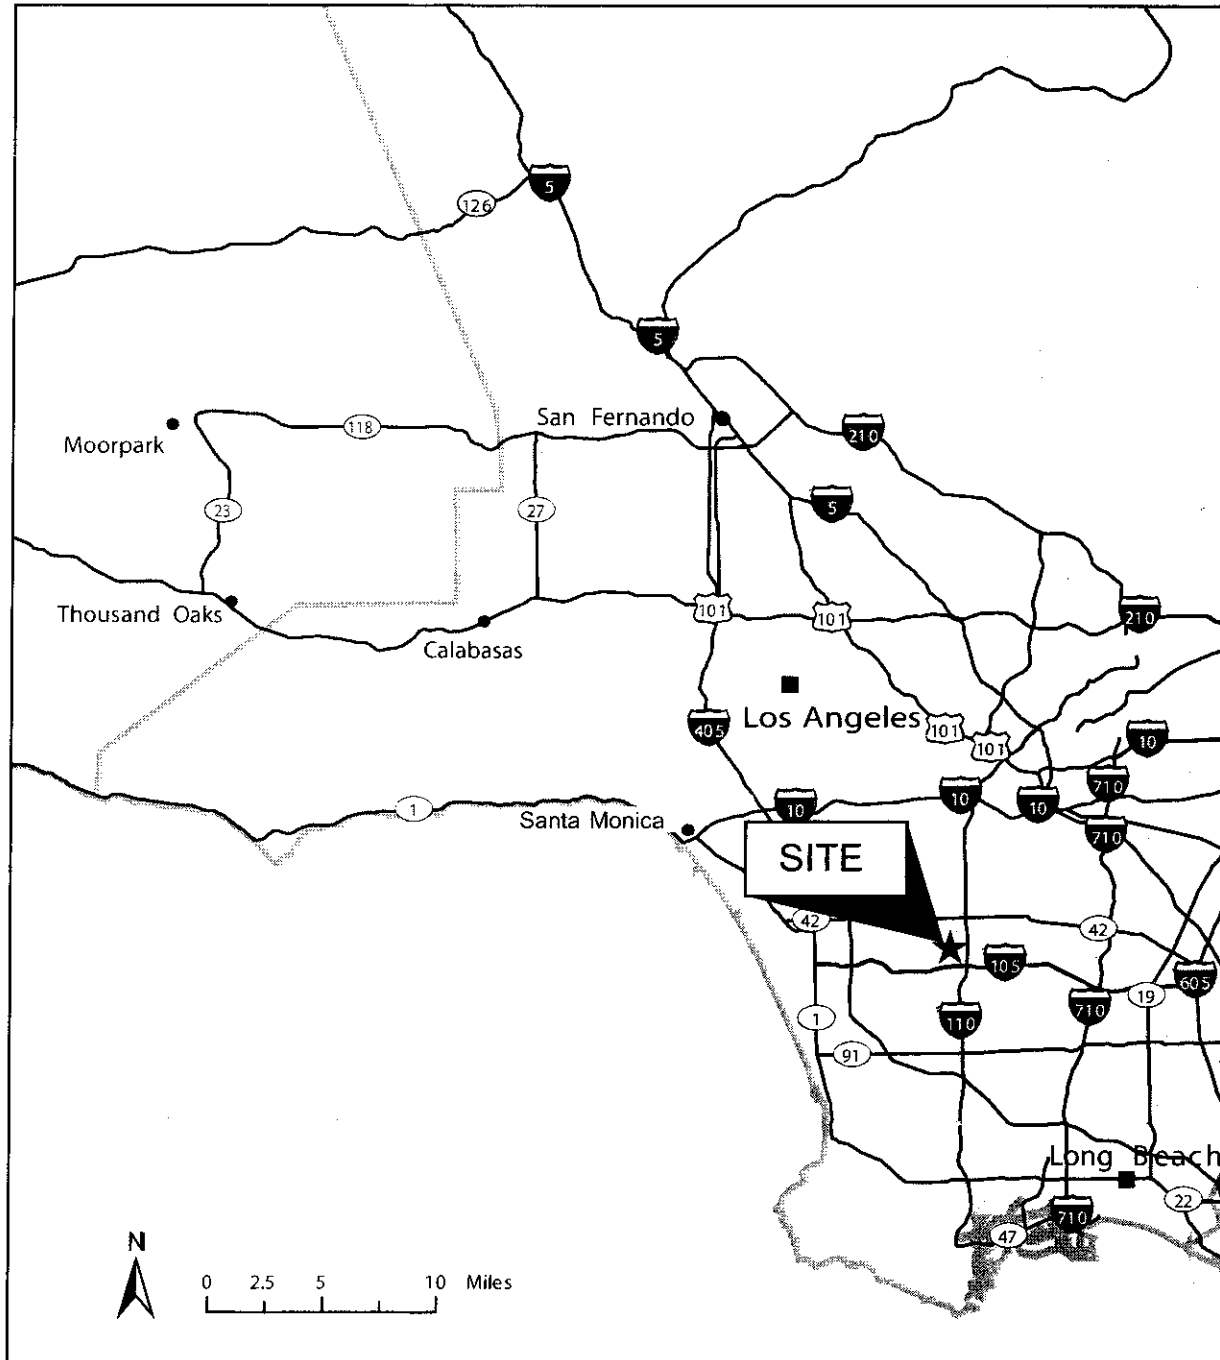

HUD - NEPA - Environmental Assessment

Project Name and Identification Number: 105th Senior Housing Project/HMD001

- 4. Additional Modifications.** Minor changes to the mitigation measures required as a condition of funding approval are permitted, but can only be made with the approval of the Executive Director of the Community Development Commission (CDC) of Los Angeles County.

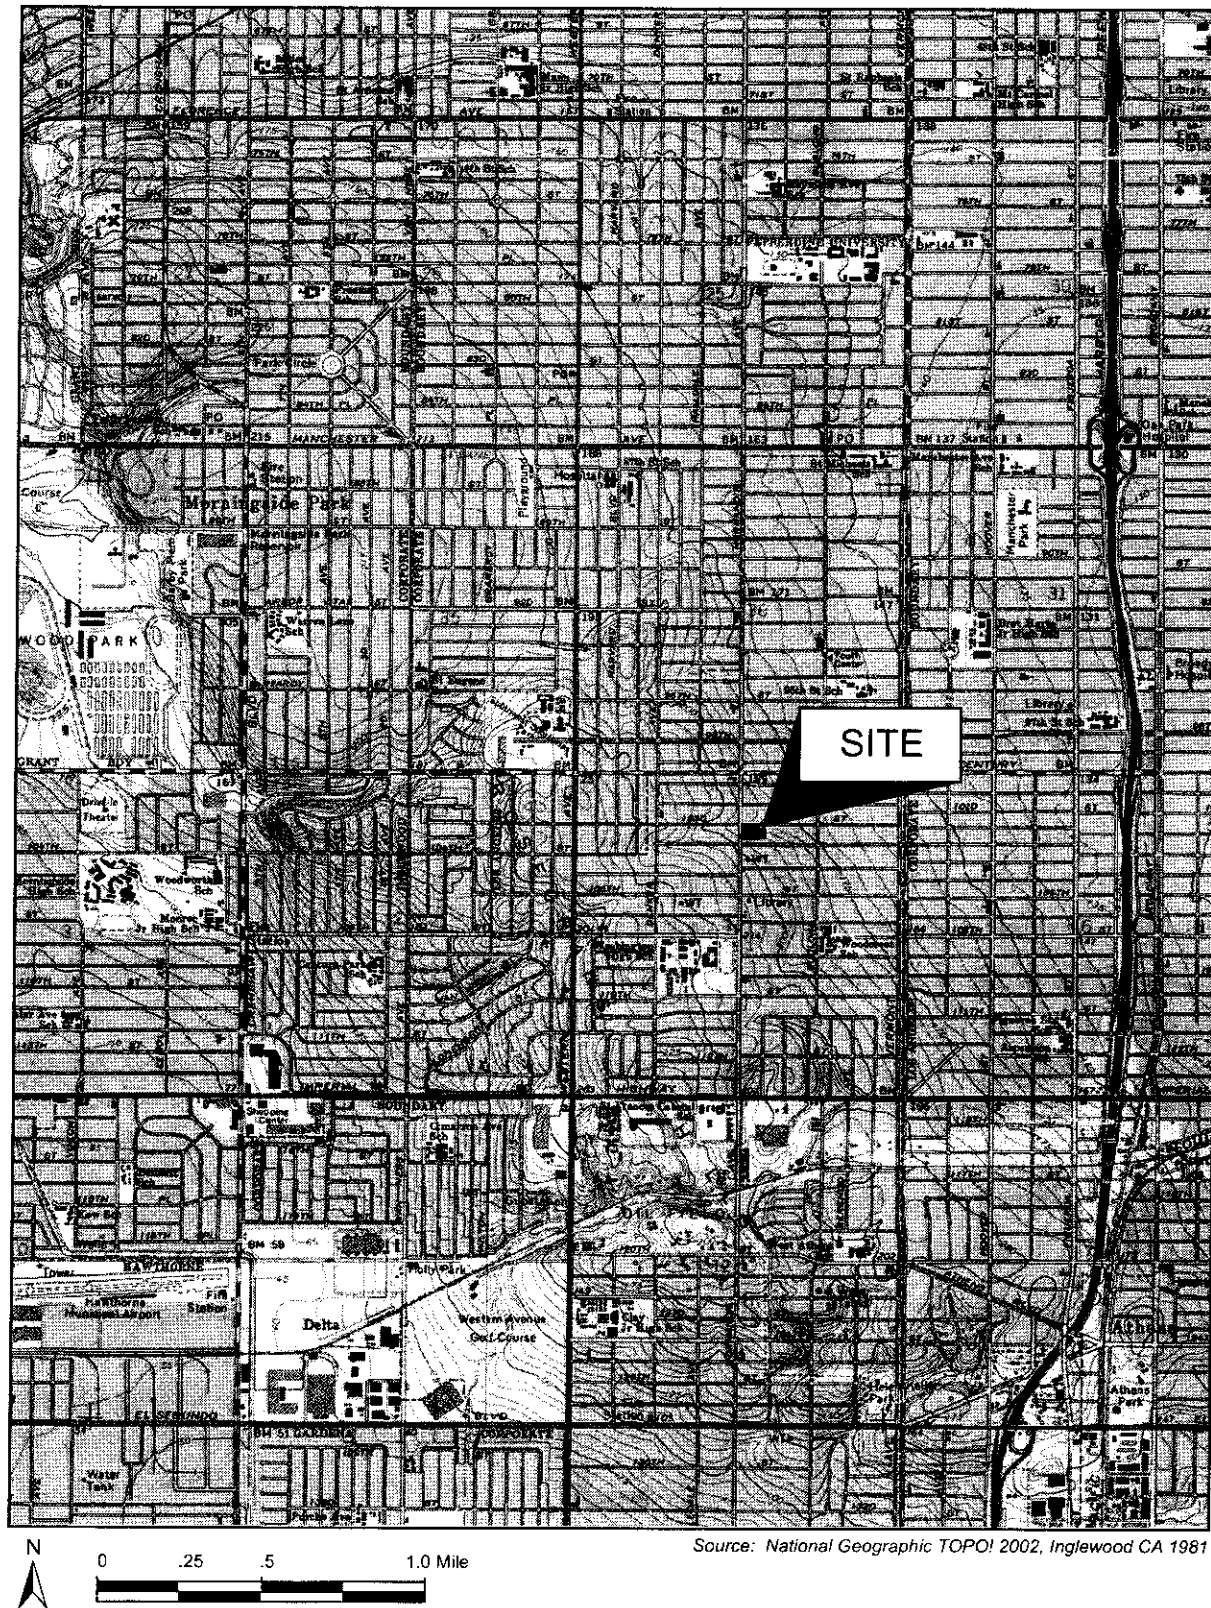

The proposed project is not expected to contribute to significant impacts to the environment and a Finding of No Significant Impact can be made.

To: Joe Power, Rincon Consultants, Inc.
From: Judy Triem, San Buenaventura Research Associates
Date: 14 September 2006
Re: Section 106 Evaluation: 105th Street Senior Housing Project HMD001

1. Description of Undertaking

The Los Angeles County Community Development Commission plans to use federal funds to construct up to 70 units of affordable rental senior housing in one building on six parcels (approximately 1.4 acres) located at 10402, 10408, 10410 & 10426 South Normandie Avenue and 1344 West 104th Street and 1335 West 105th Street in unincorporated West Athens area of Los Angeles County. [Figure 1]

The project will also include development of a community center of up to 5,000 square feet and office space of up to 4,000 square feet in one building. One vacant single family residence and two vacant office buildings will be demolished.

Off-site improvements include pavement repair, curbs, gutters, sidewalks, and utility installation.

2. Area of Potential Effect

The Area of Potential Effect (APE) includes the project site itself (APN 6060-009-900, 902, 903, 904, 905, 906), the adjacent properties and the properties across the street from the project site.

3. Description of Location of Undertaking

The project site contains six parcels, with frontage on South Normandie Avenue between 104th Street and 105th Street and one lot on 105th Street and one lot on 104th Street. There are two vacant office buildings located at 10426 S. Normandie Ave. at the corner of Normandie and 105th Street. One of the buildings was constructed in the 1920s and one in the 1950s. There is a vacant single family residence at 1335 W. 105th Street built in 1939. Across S. Normandie Ave. from the project site are both single family residences (1920s) and commercial buildings from the 1920s through the 1950s.

4. Historic Resources/National Register Determination

Historical Background

This area of unincorporated Los Angeles County, known as West Athens, appears to have been developed beginning in the early part of the twentieth century. By the 1910s and 1920s many of the streets in the area featured small bungalows and some modest commercial development was beginning to occur along Normandie Avenue between 104th and 106th streets. The property between 104th and 105th streets at 10426 S. Normandie Avenue contained the Southern California Water Company Normandie Plant on the southern half of the block. The large lot, measuring 167 by 190 feet, contained a

Section 106 Review: 105th Street Senior Housing Project (2)

pump house for two booster pumps, a water tower and a water tank and two very small pump houses. Adjacent to these buildings were two single family residences from the 1920s. Today, all of the buildings and structures are no longer remaining, except for what appears to be the building that housed the booster pumps plus a new building constructed after 1950 used as a Los Angeles County Public Works office. Along 104th and 105th streets east of Normandie were single family residences built primarily during the late 1910s and 1920s. In 1929 the Spastic Children's Foundation Private School was located in the middle of the block on W. 105th Street.

Physical Description of Buildings

10426 S. Normandie Avenue: There are two buildings at this address. The first building, constructed during the 1950s, is a long narrow building with a sawtooth roof. Windows are located along the upper portion of the building under the eaves of the sawtooth roof. The building is constructed of concrete block. [Photo 1]

The smaller building, constructed during the 1920s as part of the Southern California Water Company complex, is rectangular in plan with a low tile hip roof and covered in stucco sheathing. A fixed window is located at the northern end of the building. [Photo 2]

1335 W. 105th Street: This single family residence is rectangular in plan with a flat roof with tile parapet combined with shed roof across the front. The porch is attached with a shed roof covered with clay tile and supported by arched columns. A porte cochere extends to the side of the house off the porch with a wooden gate. Windows are aluminum sliders with wrought iron bars. There is a detached garage at the rear of the property. [Photo 4]

Area of Potential Effect: Across S. Normandie Avenue from the project site are a mix of commercial buildings from the 1930s through the 1950s and scattered single and multi-family residences from the early 1900s through the 1960s. [Photo 3] Adjacent to the project site along W. 105th Street are single family residences from the 1920s and a vacant lot where the new childcare center will be constructed. [Photo 5] Adjacent to the project site along W. 104th Street are single family residences from the 1920s. [Photo 6]

National Register Eligibility

The criteria for determining eligibility for listing on the National Register of Historic Places (NRHP) have been developed by the National Park Service. Properties may qualify for NRHP listing if they:

- A. are associated with events that have made a significant contribution to the broad patterns of our history; or
- B. are associated with the lives of persons significant in our past; or
- C. embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. have yielded, or may be likely to yield, information important in prehistory or history.

Section 106 Review: 105th Street Senior Housing Project (3)

14426 S. Normandie Avenue: Neither the 1920s or the 1950s building appear to be eligible for listing on the National Register because of their association with an event that has made a significant contribution to the history of Athens (Criterion A). The former Southern California Water Company building, constructed during the mid-1920s, once held two booster pumps. However, all the remaining tanks and buildings were removed from the site probably in the 1950s when the adjacent building was constructed for use as a Los Angeles County Public Works office.

There are no known significant persons (Criterion B) associated with this property. Neither of the buildings embody distinctive characteristics of a type or method of construction or were designed by known master architects (Criterion C). They are common buildings of their type and period. Criterion D refers to archaeology and is not pertinent to this evaluation.

1335 W. 105th Street: This single family residence built in 1939 represents one of many residences built during the 1920s and 1930s in the community but is not associated with any important event (Criterion A) in the West Athens district.

There are no known significant individuals associated with this property (Criterion B). This residence does not embody the distinctive characteristics of a type or method of construction. It was not designed by a master architect and does not have high artistic value (Criterion C). It is a very common example of a modest Spanish Colonial Revival bungalow from the 1930s. Criterion D refers to archaeology and is not pertinent to this evaluation.

Buildings within the APE: The residential and commercial buildings within the APE along South Normandie Avenue, W. 104th Street and W. 105th Street do not appear to be associated with an event that has made a significant contribution to the history of the West Athens community (Criterion A). Although they were part of the early residential and commercial development of the region, these buildings do not appear to have played a significant role in this development.

The residences and commercial buildings within the APE do not appear to be associated with the lives of any significant persons (Criterion B). The buildings do not embody the distinctive characteristics of a type or method of construction (Criterion C). They are ordinary examples of their style and period. Also, several have lost their integrity of design with changes to siding and windows. Criterion D applies to archaeology and is not relevant in this case.

In conclusion, there are presently no known buildings within the APE that are listed or eligible for listing on the National Register of Historic Places.

5. Information from Local Organizations

No information was collected from local organizations, since there are no known local preservation or historical organizations in West Athens.

September 9, 2006

I. INTRODUCTION WITH PROJECT DESCRIPTION AND LOCATION

CDC Project Name/No.: 105 th Street Senior Housing Project HMD001	Location: 10402, 10408, 10410, and 10426 South Normandie Avenue and 1344 West 104 th St., and 1335 West 105 th St., unincorporated West Athens. Los Angeles County	Thomas Bro. Grid: Pg. 704, A5	Assessor Parcel Nos. 6060-009-900, 902, 903, 904, 905, & 906	CDC Contact: Donald Dean Environmental Officer (323) 890-7186
--	--	---	---	---

This report was prepared at the request of Donald Dean of the Los Angeles County Community Development Commission (CDC). It presents the results of a Phase I archaeological investigation conducted by Conejo Archaeological Consultants (Conejo) for the 105th Street Senior Housing Project. Public funds will be used in the construction of up to 70 units of affordable rental housing for seniors on six parcels located at 10402, 10408, 10410, and 10426 South Normandie Avenue and 1344 West 104th Street and 1335 West 105th Street in the unincorporated West Athens area of Los Angeles County (Exhibits 1, 2 & 3). The project will also include development of a community center of up to 5,000 square feet and CDC office space of up to 4,000 square feet. Two vacant single family homes and one vacant government office building will be demolished. Offsite improvements will include pavement repair, curbs, gutters, sidewalks, and utility installation.

This archaeological study was undertaken in compliance with the National Historic Preservation Act (NHPA), the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA). This study also meets the cultural resource guidelines, policies and procedures as established by the United States Department of Housing and Urban Development (HUD) and the Los Angeles County Planning Department.

II. STUDY FINDINGS

Based on the South Central Coastal Information Center's (SCCIC) record search results and field survey findings, no impacts to archaeological resources will result from construction of the 105th Street Senior Housing Project. Therefore, no further archaeological investigations are warranted prior to project approval. In the event that prehistoric and/or historic cultural materials are encountered during construction, all earth disturbing work within the vicinity of the find must be temporarily halted until a qualified archaeologist can evaluate the nature and significance of the find, as detailed in Section VI of this report.

III. ENVIRONMENTAL SETTING

Physical Environment: The project's approximate 1.4-acre area of potential effect (APE) consists of Assessor Parcel Numbers (APN) 6060-009-900, 902, 903, 904, 905, & 906 (Exhibit 2). APNs 6060-009-902, 903, 904, & 905 are vacant lots. APN 6060-009-900 has a vacant government building on it. Two vacant single-family homes are located on APN 6060-009-906. The APE is bordered by

104th Street to the north, residential development to the east, 105th Street to the south, and Normandie Avenue to the west. Land use in the project vicinity includes residential and commercial development. No stands of native vegetation or drainages occur within or adjacent to the project APE.

Cultural Environment: The project site lies within the historic territory of the Native American group known as the Gabrielino, one of the wealthiest, most populous, and most powerful ethnic nationalities in aboriginal southern California (Bean and Smith 1978). The Gabrielino followed a sophisticated hunter-gatherer lifestyle, and were a deeply spiritual people (McCawley 1996). The Gabrielino territory included the Los Angeles Basin (which includes the watersheds of the Los Angeles, San Gabriel, and Santa Ana Rivers), the coast from Aliso Creek in the south to Topanga Creek in the north, and the four southern Channel Islands. For in depth information on the Gabrielino, the reader is referred to McCawley's (1996) *The First Angelinos, The Gabrielino Indians of Los Angeles*.

IV. SOURCES CONSULTED

Results:

South Central Coastal Information Center

A record search was conducted at the South Central Coastal Information Center housed at CSU Fullerton on August 31, 2006. The record search identified no prehistoric sites or historic archaeological sites within a 0.5-mile radius of the project's APE. Three archaeological surveys have been conducted within a 0.5-mile radius of the project APE. None of which included or were immediately adjacent to the project APE.

Federal, State & Local Historic Listings

The listings of the National Register of Historic Places (NRHP), California Historical Landmarks and California Points of Historical Interest include no properties within or adjacent to the project APE (National Park Service 2006; Office of Historic Preservation 2006a & 1992). The California State Historic Resources Inventory lists no significant historical properties within or immediately adjacent to the project APE (Office of Historic Preservation 2006b).

Historian Judy Triem is in the process of conducting a Section 106 review of the project APE's built environment.

V. FIELD METHODS

The approximate 1.4-acre project APE was surveyed by Mary Maki on August 31, 2006 (Exhibits 2 & 3). Ms. Maki is certified by the Register of Professional Archaeologists (RPA) and has over 17 years archaeological experience in southern California.

Linear transects spaced three meters (10 feet) apart were used to survey the northern half of the project APE, which consisted of weedy vacant lots. Ground surface visibility was fair throughout the northern half of the project APE. Recent trash was scattered throughout the survey area including broken glass, food wrappers, pieces of plastic, etc. Curb cutouts are indicative of past development. The southern half of the APE includes three vacant buildings and associated pavement. Survey methodology in the southern half of the APE was limited to "landscaped" areas including front and back yards. The ground surface throughout the entire project APE has been disturbed by grading and trenching associated with existing and past development.

No evidence of prehistoric or historic archaeological resources was observed.

VI. REMARKS

Based on the SCCIC record search results, field survey findings and extent of past ground disturbances, no impact to archaeological resources is anticipated from project development. Therefore, no further archaeological investigation is warranted prior to project implementation as long as the following two recommendations are included as conditions of project approval.

1. In the event that archaeological resources are unearthed during project construction, all earth disturbing work within 50 meters of the find must be temporarily suspended until an archaeologist has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. A Gabrielino representative should monitor any archaeological field work associated with Native American materials.
2. If human remains are unearthed, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the Los Angeles County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission.
